# The Biz4x User Guide

# Congratulations!

You've made the right choice, by joining our global Biz4x community. This guide will cover the essentials of using Biz4x with a walkthrough of four core modules: Business Management, Live FX Rates, Compliance and Customer Acquisition. You'll learn how to configure your system settings to get your business up and running on Biz4x in no time.

# Dashboard

The Biz4x dashboard allows you to easily access the following core modules through a single console:

- With **New Transaction** under Business Management, you can record all your transactions.
- **Compliance** allows you to run Know Your Customer checks to see if they are on any anti-money laundering, politically exposed persons or sanctions list.
- Live FX Rates allow you to monitor real-time market data
- Your Rates provide a reference point as well as a way to advertise your rates on a global directory for money services businesses known as Get4x
- Finally, you can track incoming bookings through the **Bookings** section.

While you can easily access key features via this dashboard, you can also access a dedicated screen for each component of the dashboard by clicking the icon with four-way arrows. On the top right corner of the screen you will see some icons. The question mark icon allows you to access support and help documents, while the bell icon will show you any notifications for the system.

The dashboard above shows you what the Biz4x console will look like when the system is fully configured, however in actuality, the Your Rates and Bookings section will initially be blank when you first log in. You will have to configure Your Currencies and Your Rates as part of your initial set-up.

# **Your Currencies**

The first thing you will need to do before using Biz4x is to set up the currencies that your business wishes to trade in.

Under Your Currencies or Settings > Your Currencies, you can add a list of currencies that you would like to manage for your business in the field on the top right corner of the screen.

The local currency on your system will be set-up based on the country your business is in. For example, if you had registered your Singapore business address for Biz4x, the local currency would be SGD. Click on the gear icon to the right of the screen to configure the settings for each currency.

124X 4xLabs - d189 - 7	示范: Currency Settings		@ 📌

When you add a foreign currency under Your Currencies for the first time, you will be able to configure various items such as the rate of precision, the number of units, number of decimal places and the direction (normal or inverse). You can choose whether to enable, or even disable certain BUY and SELL rates, so they do not appear on rateboards and other directories. When the BUY rate is highlighted in green, it means that it is enabled, while a grey SELL rate as seen in the example below means that it is disabled.

BND		
eneral settings		
arrency name	Brunei Dollar

ste Validation		
argin		
fault margin		
ustomer acquisition channels		Use report
214x 0000	OK 🔲	
oneybay 🌒		
pard rates		

Rate Validation allows you to indicate a default profit margin for your rates. You can also specify the parameters of the margin (min, max) within which the default profit margin must fall to be accepted. The default BUY and SELL margin that you set will be the basis for autorate updates that are triggered on click. This means that a user does not have to update and type in the rates manually.

Margin Margin Default margin di la	Rate Validation		
Default margin	Margin	(m) (20%)	<b>6</b> 6 (206)
			-20 -10 0 10 20 30 40 50 a0 70
	Default margin	ер ————————————————————————————————————	
		-20 -10 0 10 20 30 40 50 40 70	-20 -10 0 10 20 30 40 50 50 70

While the slider scale allows you with a visual way to update your rates, you can also opt to directly input your rates by switching to an alternative view as seen below.

Rate Validation	From (5-20%) 0	96 To (< 20%) 20	96	From (2-20%) 0	% To 20	96
Default margin	5.00		96	5.00		.96
						Use slider

The last section of the currency set-up screen allows you to choose if you want these rates to be displayed on Get4x, other partner directories or on a rateboard.

# Your Rates

Once you have set up your rate margins, you will be able to activate and deactivate all your rates with the circular ON and OFF buttons, at the top right of the screen. You can also choose to reset all your rates to the default profit margin you have earlier specified by

clicking on the circular grey D button. If you have more than one outlet on Biz4x, you can set up a separate set of rates for each outlet. You can switch between different outlets to manage the rates. To the top left of the screen, you will see a little notification that states the number of indicative rates that are active - these would be the rates that you have turned off.

% Your rates	3						Saj Exchange Comp 🔹 Add c rrency 'U	/SD*
Currency	You BUY			You SELL			Group 2 outlets Outlet 1/2	Actio
EUR		1.3811	0	6N 💭	1.7578	0	Saj Exchange Comp Saj12345	0

BDT		0.0151	0		0.0179	0		
nud 🏀		0.9636	Ø	CN D	1.0650	0		٥
ang		7.11279	0	OFF	0.786151	0		0
C ARS		0.0518	0	<b>CHI</b>	0.0573	0		¢
🛑 AMD		379.0880	0	ON 🗨	0.0029	0		٥
aoa		184.2177	0					٥
BTN	ON O	536.644	0					0

You can opt to selectively turn on and off individual BUY and SELL rates by use of the indicator beside the currencies too. In the example above, the SELL rate for AOA and BTN has been disabled, hence no rate will be displayed in that corresponding column. To edit currency settings, click on the gear icon to the right side of your screen under the Actions column. To remove a currency, you can click on the red bin icon beside the gear.

Now that you have set up your rates, you will see that these rates are listed on the main Biz4x dashboard under its corresponding section, where you will easily be able to manage and access them.

# Rateboard

Once you have set up your currencies, you can also set-up and create different rate board templates. Each rate board template is assigned a code that can be used to link this template to an outlet. You can preview a rateboard that has been created by clicking on the link to launch it in a separate window. To the right side of the screen you can click on the icon with the three gears to edit rateboard setting or the chain link icon to assign a rateboard to an outlet with the associated code.

Now that you have configured your currencies, you are all set for the Business Management and Customer Acquisition module.

#### **Customer Acquisition**

Bookings are a part of the Customer Acquisition module, and incoming customer bookings mean that you have received requests from customers to book currency at the Buy or Sell Rate you had earlier specified. Speak with your account manager to ensure that your

business is listed on Get4x so it can receive bookings. You will have to provide details like the full address, opening hours and outlet pictures. Once this is set-up, ensure that your rates are listed online. You will only receive bookings if you had earlier enabled the options to have your Buy and Sell Rates displayed on Get4x or other partner websites. Customers who go to these sites can thus book your offered Buy or Sell rate.

Once you have accepted their booking, you will have to lock in that rate for them for two hours. Customers who book a rate with your business, will show up with their Get4x booking ID within that time frame. You will be provided with customer contact information such as their email and mobile number after a booking has been accepted. Once the transaction has been completed, you can mark the status as complete.

Either party may also request for a cancellation, however a reason for the cancellation must be given. Other status include New, Approved, Completed and Rejected.

# **Business Management**

Business Management consists of several different components such as **Transactions**, **Stocks**, **Customers** and **Reports**. As you are setting up your Biz4x account for the first time, you might wish to enter all stock of your local and foreign currency and its associated cost. This will be used to tabulate your profit and loss when you begin recording transactions.

Now that you have input all your stock of currencies and your cost, you can see how much profit or loss you will make when you record transactions on the main Biz4x Dashboard. In the example below, you can see that the business does not have enough stock to proceed with this transaction. They will also incur a loss on this transaction.

Biz4x provides you with the option to record customer details, however you can also opt to record the transaction without tagging or associating it with a customer.

🗘 New t	transaction				×

Document Type	Number	Date of Issue	Date of Expiry
	Number	DD/MM/YYYY	DD/MM/YYYY

While you are recording this transaction, you can request for a compliance check to be performed on this customer simultaneously to ensure they are not on any anti-money laundering, politically exposed persons or sanctions list. Once these details have been saved in the system, you can also proceed to print. The screen below shows that no matches have come up in the compliance database for the customer name.

The input of data in the new transactions screen is governed by the **Transaction Settings** that are specified. In the example, below, a compliance check must be conducted on all transactions that are equal to or greater than 5000 in local currency. The business owner can also make it mandatory for the tellers to submit customer details, source of funds and purpose of transactions. If these details are not submitted, the teller will not be able to save the transaction in the system. A limit can also be set so that tellers can only record transaction amounts up to a certain cap.

While you can enter details about the customer through the main console, you can also access a dedicated screen which will allow you to input even more customer information in greater detail.

Biz4x makes it easy to monitor the performance of a currency exchange business with its automated management reports - Transactions, Stock and Profit and Loss from the **Reports** screen. Choose your time frame and outlets. When you click on the Export button, a csv file with the information you requested will be downloaded to your device.

You can filter between regulatory and management reports. You will only be able to see the option for generating local regulatory reports for the country in which your business is based. For example, you will only be able to see the MAS 2003 Notice if your business is in Singapore. If your business is in Malaysia, you will see a different set of regulatory reports such as MSB02 and Line by Line reports.

We only support local regulatory reports for Singapore, Malaysia and Hong Kong at the moment, but will continue to develop more regulatory reports based on customer demand.

#### Compliance

Regulators in different countries mandate that money service businesses conduct a Know Your Customer check on any individual that wishes to exchange currency beyond a certain amount. This amount differs from country to country. While you can conduct the compliance check as you are saving a transaction, customer screening can also be done in its own

separate module in Biz4x. To increase the accuracy of your search, you can opt for exact matches to increase keyword sensitivity. You can also choose to only search within certain lists, or search by a person's date of birth, identification number or country to narrow down the results.

Saj Exchange Comp: Compliance				0 🖗
	Person's name			٩
	Keywords sensitivity Search type Person's DOB Passport	Evact match      FUZy search     Sanction      FEP      Warning      Other     ddmm/bypyi     Person's Passport number		×
	Country	No country selected		
		MORE THAN 3.6M RESULT Last update on 18 May, 2018 at 05:01 AM

# **Live FX Rates**

To add currency pairs to your Live FX Rates table, go to Settings under the Live FX Rates module. You can add new currency pairs to the list at the top right corner of the screen. Clicking and dragging the icon to the left of the currency pair will allow you to reorder these pairs to your convenience. You can also specify a reference Buy and Sell rate for these currency pairs by clicking on the pencil edit icon to the right of the currency pair.

Through a **Referral**, businesses can introduce their peers or other money services businesses to Biz4x through sending an email referral. Businesses who successfully refer contacts, will be granted a free trial for several months.

		Overview Send invitations Referral status
N	Send email invitations	Add email addresses
		Separate multiple emails with commas.
	Subject	Saj Exchange Comp has invited you to a free Biz4x trial
6		I'm currently using Biz4x to manage my business and I thought you might find it useful for managing yours as well. Biz4x provides businesses with live FX rates, compliance risk management, business management and customer acquisition capabilities. Sign up for a free account and you will receive a free trial subscription to Biz4x.
		Iunderstand that the following conditions have to be met to be     credited with a free monthly subscription.
X		The new registrant that I have invited must be a licensed business     The invited business must have registered for an annual Biz4x     subscription     The invited business must not already be registered on Biz4x
		Send Invitation OR Copy Code: Z0)1G

Outlet Settings allow businesses to choose between two different receipt sizes.
